

Foaming Tea Tree Handwash with Menthol

HOMEOPATHIC

Decreases bacteria on the skin

Active ingredient: Menthol 2.4x (0.4%)

Formulated with Tea Tree oil and Menthol, this antiseptic handwash is a "natural" alternative to conventional antibacterial hand soaps. When tested via the In-Vitro Time Kill Test, it demonstrates effectiveness against gram-negative organisms Salmonella Choleraesuis and E. coli.

-Benefits Of Tea Tree Oil-

Tea tree oil, or Melaleuca alternifolia is a 100% natural product. It is made entirely from a renewable natural resource and is completely environmentally friendly. Tea tree oil is a native Australian plant that has been used by Aboriginal tribes for hundreds of years as a healing plant for treatment of cuts and skin infections. The name "tea tree" has its origin in 1770 when the famous British explorer Captain Cook brewed the leaves of the tree for his men to drink to prevent scurvy. In 1923, clinical trials in Australia began to provide scientific evidence for tea tree's antiseptic properties. Today, Tea Tree oil has many applications, including: medicinal - infections, minor burns, cuts, sore throats, cold sores, and acne; skin care - deodorants, anti-dandruff shampoos and hand lotions; personal hygiene toothpaste and mouthwash, and many other applications.

-Benefits Of Menthol-

Menthol is derived from oil of peppermint and is also 100% natural and environmentally friendly. It is widely used as a topical antipruritic, local analgesic, local anesthetic and an antiseptic. It is recognized as a homeopathic treatment in Homeopathic Pharmacopeia of the United States. Menthol is used in numerous consumer products, such as mouthwash, facial cleansers, shampoos, acne treatments, shaving products, and many others.

Directions: Apply 5 milliliters (teaspoonful) or palmful to hands. Scrub thoroughly for 30 seconds and rinse.

Other Ingredients: Water, Alkyl Polyglycoside, Sodium Lauryl Sulfate, Ethanol, Propylene Glycol, Tea Tree Oil, Methyl Paraben, Propyl Paraben, Citric Acid, Dye.
